Operative clauses should be numbered

The first sub-level (sub-clauses) should be labelled with a lowercase letter

Any operative clause should NOT have more than 3 sub-clauses (first sub-level)

The second sub-level (sub-sub-clauses) should be labelled with a lowercase letter

→ *Noting with satisfaction* a report from the Internet World Stats which showed an internet penetration rate in Libya of 59% in 2017 (around 4 million Libyans having access to an internet connection) which was a result of increased 3G coverage across the nation and the introduction of 4G network,

↑ There should be a single-line space between each preambulatory clause

Recognizing the efforts made by United Nations Children's Fund to reinstate traditional learning as of September, 2020 and learning institutes such as the Research, Consultant and Training Centre of the University of Tripoli who employed the use of online learning strategies to help curb the digital divide's impacts on education even through the coronavirus pandemic,

1. Suggests for a conference held between major political leaders of Libya in the People's Hall in Tripoli at a time to be dictated by the UNICEF to discuss the following agenda:

Operative clauses that have sub-clauses should be followed by a (full) colon

a. Implementation of new technological advancements and aids to strengthen the wellbeing of Libya's citizens and for the benefit of the children of Libya who are unable to access an education due to the digital divide; ← Operative clauses that DO NOT have sub-clauses should be followed by a (semi) colon

b. Increase awareness of technological aids throughout the nation to reduce inequalities and increase opportunities for the less fortunate citizens of Libya and implement legislative measures against vandalism of technological aids and infrastructure used for the benefit of the nation;

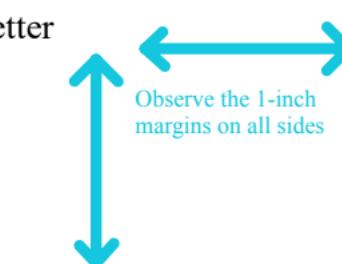

c. Initiation of a new sub division of the government in Libya to be in-charge of all technological advances nationwide, to provide ways forward regarding the internet and technology in Libya and to watch over criminal activity regarding the same called the Ministry of Advancements in Technology and the Internet (MATI);

2. Calls upon the UN donor nations and Non-Governmental Organisations to donate a sum of 11,396,501 USD to be allocated to the establishment of 5 facilities of two floors in the 5 prominent cities of: Tripoli, Benghazi, Misratah, Tarhuna and Al Khums, to implement technological aids regarding education and all citizens as a whole, and to be divided as follows:

There should be a single-line space between each operative clause

a. 5,193,685 USD to accommodate to the construction, raw material acquisition and other necessary equipment required; by Jotun Construction Company, to establish the facility (35.96 USD per square metre).

i. The facilities will be divided into two sections with the first being a library (of 232 square metres) housing 20,000 volumes of books (50 USD each) which entirely cost 1,008,343 USD each to allow the youth, school-going children and education pursuing citizens of Libya to gain access to better

Observe the 1-inch margins on all sides

educational facilities and amenities to improve their learning experiences (totalling up to 5,041,715 USD);

- ii. The second section will be an internet café (of 225 square metres) housing 50 computer stations (500 USD per station) which entirely cost 30,394 USD each to combat the low amount of people accessing online education and learning and allow for easy internet access for the Libyan citizens (totalling up to 151,970 USD);
- iii. 5.66 USD per hour to accommodate the daily salary for 30 construction workers provided by Jotun Construction Company for two months (totalling up to 1,141,056 USD);
- b. 2,589,888 USD to be allocated to the acquisition of internet services from TS2 Space – a local high speed Internet Service Provider, in these facilities (which costs 5,396 USD monthly)

Observe how the operative clauses do NOT exceed 4 lines in length
